How to Install R?

1) Visit to https://cran.r-project.org/ and download as per your operating system.

2) Follow the instructions to download the software.

3) Double click on R icon. A window will appear. In that window, type at the prompt,
   install.packages("mclust") [and press enter]

4) A list of servers will appear. Choose the top most one i.e.
   Choose 0-Cloud [https]
   Installation will start automatically.

5) After the installation is complete, type
   library("mclust") [and press enter]

6) Install other packages (class, cluster, ElemStatLearn) exactly in the same way.

How to Install R studio?
